COURSE CODE: **DE200_4**

Making sense of ourselves

<https://www.open.edu/openlearn/health-sports-psychology/making-sense-ourselves/content-section-0>

Course summary

This free course, Making sense of ourselves, introduces you to well-known psychological topics by asking and answering everyday questions, such as *Why don't we like one another? Why would I hang around with you? Do you see what I see? What's the point of childhood?* You'll learn how psychologists can go about addressing these questions using different research tools and approaches.

Learning outcomes

By completing this course, the learner should be able to:

- explain some of the key aspects of prejudice and how and why they are important
- describe basic elements in the study of the psychology of personal relationships such as love and friendship
- understand how visual illusions are used to explore the visual system and how psychologists research vision
- understand the role of theory of mind in researching child development.

Completed study

The learner has completed the following:

Section 1

Why don't we like one another?

Section 2

Why would I hang around with you?

Section 3

Do you see what I see?

Section 4

What's the point of childhood?
